HTML Tags
HTML code uses "tags" to define structure

<html>

Tags use corresponding "opening" and "closing" parts*

<html>   </html>

▲
a slash denotes a closing tag

A pair of tags creates a block

*there are a few exceptions

Typical HTML tags

<html>	HTML document
<head>	head
<body>	body
<title>	title
<p>	paragraph
<h1>	headline 1 (h1-h6)
 	line break*
<a>	anchor (used for hyperlink)
<strong>	strong (bold)
<em>	emphasis (italic)
<hr />	horizontal rule*

HTML document structure
Every HTML document has 3 essential parts.

» <html> defines the document as an HTML document
» <head> contains meta data and scripts
» <body> contains visible content

<html>

<head>   META DATA

<title></title>

</head>

<body>

CONTENT

</body>

</html>
