

GDES 308 Web Page Design

Linking

Link files together by using the anchor tag

```
<a>
```

The anchor tag can be wrapped around text or an image

```
<a>biography</a>
```

The path to the file must be included in the opening anchor tag.

```
<a href="bio.html">biography</a>
```

Images

Place an image on the page using the image tag

```
<img />
```

Set the source of the image file

```

```

Specify the dimensions of the image (100% @ 72dpi)

```

```

GDES 308 Web Page Design

Lists

Create a list by using either the **ul** (unorderd list) or **ol** (ordered list) tag

```
<ul></ul>
```

Create an item in the list using the **li** (list item) tag

```
<ul>  
  <li>item 1</li>  
  <li>item 2</li>  
</ul>
```

Tables

Create a table by using the table tag

```
<table></table>
```

We must then create cells, first starting with rows, then individual cells

```
<table>  
  <tr>  
    <td>cell 1</td>  
    <td>cell 2</td>  
  </tr>  
  <tr>  
    <td>cell 3</td>  
    <td>cell 4</td>  
  </tr>  
</table>
```

1	2
3	4

Use colspan to create spanning cells. rowspan works similarly

```
<table>  
  <tr>  
    <td colspan="2">cell 1</td>  
  </tr>  
  <tr>  
    <td>cell 2</td>  
    <td>cell 3</td>  
  </tr>  
</table>
```
